

Township of North Brunswick

Case Study:

BACKGROUND:

***In 2004,
the Township
of North Brunswick
celebrated
its 225th
Anniversary.***

Needs Assessment

When the Township of North Brunswick approached Amano during the New Jersey League of Municipalities 2003 annual conference, they were looking to combine door access control with a comprehensive employee identification card system. While the Township pursued discussions with several vendors, Amano had the most developed integrated solution. Additionally, the Township had heard of Amano through its integrated access control / time and attendance implementations for other municipalities throughout the state of New Jersey. The Township felt most comfortable relying on the core expertise Amano had established developing integrated solutions for other Municipalities.

AMANO®

Amano Solution

North Brunswick Township selected the Amano solution because of the ease in which the entire system could be upgraded/extended to meet their future growth needs. The initial implementation could be extended effortlessly throughout the Township's primary Municipal building, as well as in other remote Township facilities.

The Amano solution easily incorporated existing WAN infrastructure, thus reducing costs significantly.

Amano Results

- ▶ North Brunswick Township has had their Amano access control/time and attendance system in place and operational since July 2004 without incident. Their Amano certified installation team helped them to completely configure all the necessary settings.
- ▶ The Township Council members were extremely happy with the short time it took to complete the installation and testing phases, and are completely satisfied with the finished project.
- ▶ The Township's outdated magnetic stripe card system and central control computer that came with the building (in 1990) would go down periodically, and they couldn't change employee permissions or issue new cards. Town employees were forced to share cards.
- ▶ Now their people are happy, and the Township's network administrators can enable employees to have access to specific areas and adjust privileges instantaneously system-wide.

CLIENT COMMENT:

“The Amano access control integrated solution has enabled us to provide far greater security for our Municipal building than ever before. The added security, logging, and monitoring capabilities are much needed in today’s society. The Amano system, in conjunction with our installation company, has allowed us to offer this high level of security to the residents and employees of the Township of North Brunswick.”

*Keith S. Progebin,
MCP, Network Administrator*
